- Reference data separated from records. VACCINE, ALLERGY, VITAL_SIGN_TYPE and DIAGNOSIS now sit in a new top row. The original top row became the records: PATIENT_VACCINATION, PATIENT_ALLERGY, VITAL_SIGN and VISIT_DIAGNOSIS.
- PATIENT_INSURANCE now sits between Insurance Company and Patient. It records policy number, coverage type, and coverage start and end dates.
- PRESCRIPTION now sits between Visit and Medication. It records prescription date, dosage, frequency and duration. Medication moved one spot to the right to make room.
